MOHAMED EL HADI
SEMINAR CHAIRMAN
THE DEAN: PROF. KENNOUF SEDDIK

PRESENTATION AND OBJECTIVES

Since the dawn of time, human beings have used plants for food, treatment of illnesses and to adorn themselves. The plants are certainly the first medicines used by men. The evolution of research techniques and extraction methods, has allowed the isolation of plant active ingredients of natural origin. Taking advantage of the congress of biochemistry, biology and pharmacology, plant active molecules became more scientifically oriented and the base of many research projects. Medical sciences on its turn were attracted by these discoveries and thus more importance was given to these natural products whose safe use was perfectly recognized, and subsequently they were widely synthesized, formulated at industrial level and then marketed.

It should be noted that there is a great fear of the harmful side effects of conventional medicines on human health. Therefore, the tendency towards phytotherapy as an alternative medicine has brought medicine closer to individuals and nature.

NATIONAL SEMINAR ON PHYTOTHERAPY AND PHARMACOGNOSY

This scientific seminar has the following objectives

- Present the results of research (innovations, processes, etc.) on biomolecules.
- Evaluate research work and results between universities and research centers in this field.
- Involve more ethnobotanical results for the improvement and valorization of new products in the economic sector.

TOPICS

Theme1: Valorization and biological activities of bioactive molecules.

Theme2: Extraction, purification and identification of biomolecules.

Theme3: Exploitation of natural resources in the socio-economic sector.

Theme4: Toxicity of natural products and chronic diseases.

INSTRUCTIONS TO AUTHORS

In addition to the registration form (to be completed carefully), abstracts must be written on a Word document, Times New Roman, font 11, single-spaced), leaving margins of 2.5 cm (top and bottom) and 3 cm (left and right). The abstract must not exceed 300 words and must specify the objectives, methods and results of the study. **The title** of the abstract must be written in Times New Roman, centered, font 12, bold and lowercase. **The names of authors**, co-authors, affiliations as well as email address of corresponding author, must be presented just after the title, centered, single-spaced, font 10. Abstracts must also contain a maximum of 5 keywords.

The abstracts as well as the registration form must be sent to the e-mail address corresponding to each theme. Abstracts must be written in English and sent in a **Word version (docx)**.
