Preamble

The Mediterranean basin is one of the most complex regions on the Earth, with wide geographic diversity, a long history and very dynamic and changing socio-environmental processes.

The Workshop on Mediterranean Geography (and related sciences), consists of 10 sessions on different topics of geography with a modern approach. It is organized by the Institute of Architecture and Earth Sciences of Ferhat Abbas University, Sétif 1, in collaboration with the University of Barcelona, and with the participation of several researchers from other Spanish, Algerian and Moroccan universities.

The topics of this workshop aim to discuss and propose solutions to the geographic problems, both environmental and socioeconomic, of the Western Mediterranean countries in the context of global change.
